

California OES Weather Threat Briefing

Tuesday, August 25, 2020 9:00 AM PDT

Day 1 (Tuesday): A moderate to high risk of heat related health impacts continues today across interior portions of Southern Region.

WEATHER KEY POINTS 08/25/20 - 08/31/20

Tuesday-Friday

- · Isolated thunderstorms remain possible, primarily in far northern and northeastern California
 - Increased fire weather concerns due to potential for dry lightning and gusty winds near storms
 - · Significant rainfall is not expected
- · Moderate to high risk of heat related health impacts continues across interior portions of Southern Region
- · Reduced air quality will still remain an issue due to the extensive smoke being produced by the numerous wildfires across the state

Saturday-Monday

- · Cooling temperatures will lead to decreasing heat concerns
- · Coverage of thunderstorms is expected to significantly decrease
- Elevated fire weather concerns will likely persist statewide due to warm temperatures, low humidity, and occasionally gusty conditions.
